

Mineral Sector Growth Model

Based on fundamentals of mineral sector, i.e. exploration precedes mineral development. However, exploration is high risk and only 1 in a 1000 may become a feasible mining project down the line.

To grow the sector, exploration must grow first. This will deliver 3 key strategic outcomes :

1. Discovery of new prospects.
2. Advance existing projects towards mining.
3. Extend mine life of operating mines.
